

Join Global Biomedicine's Working Group:

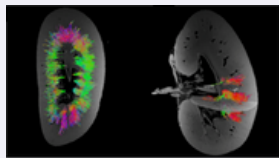

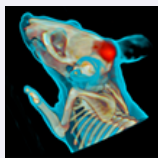

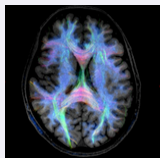

Biomedical Imaging Community

Biomedical imaging uses **advanced noninvasive technologies** to explore the structure and function of **living organisms**, playing a key role in clinical practice and research.

Our working group aims to **boost the visibility** and integration of biomedical imaging worldwide by fostering partnerships and providing expert guidance.

Join our mission to strengthen the global community and advance imaging from molecular studies to pre-clinical research

Chairs: Linda Chaabane (Euro-Biomedicine Med-Hub, Torino, Italy) and Graham Galloway (Herston Imaging Research Facility, Brisbane, Australia)
